IS THERE A WAY TO COOPERATE AND INNOVATE?

**YOUR BIGGEST RISK IS YOU.
AND WE DO NOT TALK SUFFICIENTLY ABOUT PEOPLE
AND THEIR KEY INFLUENCE ON PROJECTS SUCCESS.**

We would like to get attention to the lack of cooperation and innovation in the construction industry and talk more about relationships, behavioural aspects, and motivation in construction projects. We know that we must respect the current state of doing construction business, so we focus in **Section A** (Contracts and Project Management) on the current trends and case studies. But in **Section B** (Fair Relationships and Innovation) we want to talk about the basic motivations of people on the site and the influence of digitization as main areas with the biggest potential for change, innovation and better relationships.
